used in company manufacturing plants or sold to  
origin of the raw material. Certified under the **PI**

### Forest Management System

Canfor's Forest Management System (FMS) is a system  
addressing and managing environmental impacts and s  
commitments within Canfor's Forest Management Group

#### Scope:

The scope of the FMS includes all activities within Canfor  
company forest tenures, including activities performed b  
and contractors. The FMS includes all activities from pl  
and up to, but not including, the truck weigh scales. W  
been implemented, the scope for this component of the  
scales, log yard, and facility to, and including, the produ  
transport to ship it from the facility.

It is recommended that operations outside the scope of  
used for activities within the scope of our FMS so that c
